

2004 California Achievement Tests, Sixth Edition Survey (CAT/6 Survey)

Number of Test Items and Test Administration Time Required for Each Grade and Test

The time for each test session listed below includes time for the test administrators to distribute materials, give directions, and collect materials, as well as student working time needed for each test. CAT/6 Survey tests are timed tests. Test administrators must use the *Directions for Administration* to determine the time limits for each CAT/6 Survey test. Except for students with Individualized Education Programs (IEPs) or 504 plans who are being tested with the additional time accommodation, all students have working time limits that must be followed. Not timing these tests will result in invalidating the students' scores. Students are to be given a short break between part 1 and part 2 of the reading/language arts test, but both parts of the test must be administered in a single session on the same day.
